

## Dynex Certified Service

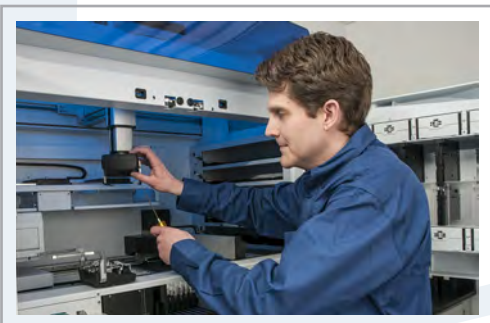

Congratulations on your purchase of a Dynex Automated ELISA Processing System! You have made a valuable investment in your laboratory's efficiency that will provide you with lasting benefits for years to come. To ensure your Dynex system continues to run at peak performance levels, you must keep it well maintained. The question is, should you trust the maintenance of such a vital contributor of your lab's productivity to just anyone?

### Factory Trained Experts

Fortunately, Dynex makes it easy with a variety of Dynex Certified Service Contract options to suit your needs, all of which include regular preventive maintenance visits by factory certified Dynex Field Service Engineers. These technicians are the **ONLY** service engineers trained and equipped to support **AND** update current hardware, firmware and software on Dynex Technologies automated systems.

### One less thing to worry about

Remember, if your Dynex system is not being serviced by a Dynex technician, you aren't receiving the expertise needed to keep your investment, and your lab, running without interruption. Contact Dynex today to find out how easy it is to get the peace of mind only the experts can provide.
